EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with LaRhonda Jefferson-Mills (61,649) on 08/28/2008.

The application has been amended as follows:

Please amend claim 1 as follows:

1. (Currently Amended) A computer implemented method in a data processing system for conducting an inventory of the data processing system, the computer implemented method comprising:

launching a basic input output system comprising an inventory process during a boot process for the data processing system, wherein the basic input output system initiates the inventory process, wherein the inventory process collects a hardware inventory of components in the data processing system, wherein the data processing system is one in a plurality of data processing systems in a network;

responsive to launching the basic input output system during the boot process of the data processing system, identifying, by the initiated inventory process, hardware components in the data processing system to form an inventory prior to the launching of an operating system; and

Art Unit: 2155

sending a report comprising the inventory to a listener server on the network using a communications interface, prior to launching the operating system, wherein a format type of the report is type in a group consisting of extensible mark up language, hypertext markup language, text in a flat file, and simple network management protocol, and wherein the listener server collects and receives the report from each data processing system on the network, ~~and~~ wherein the listener server is a default listener server, and wherein the identifying and sending are performed according to settings stored on each data processing system.

2. The following is an examiner's statement of reasons for allowance: In addition to the remarks filed 07/09/08, the primary reasons for allowance are the inclusion of the following limitations as a whole in a method directed towards conducting an inventory of a data processing system:

“ responsive to launching the basic input output system during the boot process of the data processing system, identifying, by the initiated inventory process, hardware components in the data processing system to form an inventory prior to the launching of an operating system; and

sending a report comprising the inventory to a listener server on the network using a communications interface, prior to launching the operating system, wherein a format type of the report is type in a group consisting of extensible mark up language, hypertext markup language, text in a flat file, and simple network management protocol, and wherein the listener server collects and receives the report from each data processing system on the network, wherein the listener server is a default listener server, and wherein the identifying

This subject matter is not found in the prior art nor is it obvious in view of the prior art.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
